## PROFESSIONAL EXPERIENCE

---

**Devmountain** | Lehi, UT

*August 2023 - December 2023*

*Web Developer / Software Engineer (student)*

Group Project Web Application - [Github](#)

Role: Lead Developer | Technologies: React | Redux | NodeJS | Express | PostgreSQL | Axios | React Router

- Spearheaded a team of 4 developers in crafting 'ForeverFurFamilies' a platform aimed at connecting rescue animals with potential adopters
- Engineered the project's database schema and API endpoints, optimizing query performance and bolstering data security
- Played a pivotal role in frontend development, introducing a responsive and intuitive interface that markedly improved user experience and engagement
- Participated in agile development cycles, including sprint planning, daily standups, and retrospectives to continuously iterate on the product based on feedback

Individual E-Commerce Web Application - [Github](#)

React | Redux | NodeJS | Express | PostgreSQL | Axios | React Router

- Developed a full-stack e-commerce web application enabling users to browse products, manage shopping carts, process orders, and submit product reviews
- Implemented RESTful APIs for user authentication, order management, and CRUD operations on product data
- Successfully integrated responsive web design principles for a seamless user experience across various devices

**Nielsen Holdings Inc.** | Salt Lake City, UT

*June 2021 - December 2022*

*Membership Representative*

- Conducted targeted outreach and onboarding for over 100 households into a comprehensive digital media research platform, focusing on data-driven analysis of television and internet consumption patterns
- Cultivated lasting relationships with panel members through regular engagement and personalized communication, ensuring a stable and responsive participant base for market research initiatives
- Utilized advanced data analytics to interpret viewership patterns, translating complex datasets into actionable insights for media strategy optimization in the Salt Lake City market

- Managed the integration of audience measurements tools across multiple platforms, ensuring seamless operation and data synchronization for robust market research and reporting

**Larry H Miller Group** | Salt Lake City, UT

*August 2019 - December 2020*

*Event Security Coordinator(Vivint Arena)*

- Developed and implemented a security protocol leveraging surveillance and crowd management technology to maintain a secure environment for over 15,000 event attendees
- Facilitated conflict resolution and ensured the integrity of the event experience by employing advanced communication and surveillance systems
- Developed comprehensive event security plans to ensure staff preparedness and coordinated with local emergency services to establish rapid response protocols for potential security incidents
